

COURSE EQUIVALENCY

Course Identification Numbering System (C-ID)

The Course Identification Numbering System (C-ID) is a statewide numbering system independent from the course numbers assigned by local California community colleges. A C-ID number signals that participating California colleges and universities have determined that courses are comparable in content and scope. Courses with matching C-ID numbers may be used interchangeably to meet major requirements for any AA, AS, AA-T, or AS-T major at Fullerton College. Students who successfully complete a course with an approved C-ID number or who have exceeded the maximum number of attempts allowed as outlined by Title 5 of the California Code of Regulation may not enroll in any other course within the District with the same C-ID (see Course Repetition).

Honors Courses – Equivalency

An Honors version of any Fullerton College course, designated by the letter “H” after the course number, is considered equivalent to the traditional version of the course for the purpose of meeting Fullerton College prerequisite, corequisite, General Education (GE), and major requirements. Thus, an honors course may be used to meet any Fullerton College requirement satisfied by the traditional version of that course.

Math Courses with Support – Equivalency

Any mathematics course with embedded support at Fullerton College is considered equivalent to the traditional version of the course for the purpose of course repetition, prerequisite, corequisite, Fullerton College Associate Degree General Education (GE), and major requirements. Thus, the enhanced support version of the course may be used to meet any Fullerton College requirement satisfied by the traditional version of that course.
